

# Micro-perforated polyester fleece

## Triflex Special Fleece PF

### Product information

#### Applications

Triflex Special Fleece PF is used for reinforcement and layer thickness control with Triflex PMMA systems.

#### Properties

Triflex Special Fleece PF is a micro-perforated fleece polyester with material-reinforcing and crack-bridging properties. The perforations in the fleece ensure fast absorption of the resin and reduce the risk of air inclusions. The mass per unit area is 110 g/m<sup>2</sup>.

- Protected by utility model
- Patent pending

105.00 cm x 50 m	w x l	Triflex Special Fleece PF

#### Colours

White

#### Storage

Store Triflex Special Fleece PF in a dry place and protect against moisture and dampness.

#### Instructions for use

Designed for application with Triflex PMMA systems. The fleece is embedded and saturated in the resin and pressed down to remove all creases and voids. The fleece is fully saturated wet-on-wet; see also the Triflex system descriptions. Fleece strips and lengths must overlap at least 5 cm at the transitions. The Triflex lettering on the fleece indicates the overlap.

#### General notes

We guarantee the consistently high quality of our products. Non-system substances must not be added to Triflex systems.

The advice we give in relation to the application of our products is based on extensive development and many years of experience, and is correct to the best of our knowledge. Given the multitude of on-site requirements, under the most varied of conditions, the user is required to test the product's suitability for its respective purpose. Technical information is subject to change without notice in the interests of technical advancement or enhancement of our products.
